OTHER CONSULTING AND WRITING

I have been a consultant on genetics and public health issues to the World Health Organization, the French Parliament, the government of Dubai, and the science ministers of the G12 countries, as well as to U.S. federal agencies. With a \$5 million *cy pres* award, I was involved in policy development and overseeing *pro bono* litigation related to discrimination against people with diabetes. I have engaged in *pro bono* litigation and have filed amicus briefs in the U.S. Supreme Court and other courts. I wrote amicus briefs filed in the District Court for the Southern District of New York, the Court of Appeals for the Federal Circuit and the U.S. Supreme Court on behalf of the American Medical Association and other organizations challenging patents on genetic sequences related to breast cancer. In that case, the Court unanimously held, as we argued, that a human gene is not patentable.

I have also published popular press articles, including in *The New York Times Magazine*, *New York Magazine*, *The Washington Post*, the *Los Angeles Times*, the *Chicago Tribune*, *Parade*, and *Playboy*. I have been interviewed extensively by newspapers and have frequently appeared on television shows including *CBS Morning News*, *The Today Show*, *Nightline*, *60 Minutes*, and *Oprah*. In my novels, *Sequence* (St. Martin's Press, 2006), *The Silent Assassin* (St. Martin's Press, 2007) and *Immunity* (St. Martin's Press, 2008, 2020), I raise genetics policy issues I address as a scholar.
